

G. Termination of a Radiation Program

1. Whenever a radiation program is to be terminated or an area is to be returned to non-radiation use, the RSO must be notified. A radiation program is not terminated until the RSO/RSS determines that:
 - a. All sources and contamination have been removed.
 - b. All warning signs have been removed.
 - c. The responsibility for existing radioactive sources has been properly transferred.
 - d. All required records and other radiation protection matters have been completed and reviewed.
 - e. The PI has received a written statement from the RSO, confirming that the radiation program has been terminated.
