	iPad		
<b>Sprint</b> NCI Master Account #: N/A Sales & Support → David DiCarlo (703) 898-7937 <a href="mailto:David.Dicarlo@sprint.com">David.Dicarlo@sprint.com</a>	BB	Custom BB Bundle with 400 minutes + unlimited data + 1k texts	\$48
	iPhone	Custom iPhone Bundle with 500 minutes + unlimited texts	\$48
	iPad	TBD	TBD

- When establishing **new service**, please reference the vendor-specific **NCI parent account number** to ensure that the new service is captured under the NCI umbrella and becomes eligible for the appropriate government rates & terms.
- Whenever possible, **establish new mobile device lines under an existing account** as this kind of “bundling” **may reduce overall costs** via lower plan prices or pooling. However, please be aware that the establishment of the NCI parent account does not automatically qualify lines for bundling or pooling. If you are interested in bundling lines across multiple CANs, there is a way to split orders in POTS so that individual line items are processed against different CANs. Please contact your resident POTS expert for assistance.
- With respect to mobile device service, NCI is **not bound by contracts or service agreements**, which means that you can **change/suspend/cancel** plans or features at **any time**. **Devices** are usually (but not always) **eligible** for upgrade **every 11 months**.
- To ensure procurements are processed under the correct object class codes in POTS, **please use the correct object class codes in POTS: Mobile device-related service** = object class code **23.v3** / **mobile device-related equipment** = object class code **31.9k**
